# gruppoGabel

Pretti\*

Vallesusa®

# 60

Anni con te

ogni giorno, ogni notte

*Gabel is a leading industrial group in the textile sector, since 1957 standing out on the European competitive scene for its capacity to produce a full range of household linen and textiles.*

*With its brands Gabel 1957, Somma 1867, Vallesusa and Pretti, the Gabel Group offers a wide range of articles having diversified positions, styles and targets that satisfy even the most discerning of consumers.*

*A group with solid roots deep in the Como lake district where taste and style find fertile ground for growth. Como has always been a cradle for textile creativity and our company is a perfect example of this culture of taste, quality and internationality.*

## **Our values.**

*The common denominator of the Gabel Group is constant attention to quality at every single stage, from conception to production and distribution. Careful selection of the best raw materials, worked and woven on the most modern of production lines shines through in collections that express Italian creativity and style. Quality, style and a love for "the making" in other words our distinguishing features. The same love and attention that Gabel has always shown for the environment. All the group's production plants in fact only use energy from renewable sources; all the other production units and stores throughout Italy also use only clean energy.*

*We are ambassadors of Made in Italy in the world, we believe that the values of beauty, luxury, well-being and passion that identify Made in Italy should be those that represent us, and for this we invest to enhance our brands and always offer collections emotional and innovative.*

*Experience and know-how, together with love and passion for what we do, translate into precision and maximum quality, guaranteed by direct management of the entire production chain, from yarn to packaging. The production is divided between the units in Buglio in Monte (towelling and weaving) and Rovellasca (textile ennobling).*
