Live Pure by BOEN

YOUR STYLE · YOUR FLOOR

Wood in its most beautiful form

In visual terms, untreated wood is the most attractive option. To make sure that it remains hard-wearing, we have developed a completely new surface treatment. Live Pure makes your home naturally beautiful.

It feels amazing to the touch, is authentic and it looks good. Natural wood is unparalleled. But can a hardwood floor made from wood retain this unique look and also withstand the stresses of everyday life in our homes? The BOEN development team has worked on this in our laboratory for several years now and come up with a solution: the innovative surface technology Live Pure.

BENEFITS AT A GLANCE

- *Innovative surface technology*
- *Looks like untreated wood*
- *High abrasion resistance and chemical resistance*
- *Easy to care for*
- *High UV stability*
- *Wood colours that suit current interior trends*

High abrasion resistance and chemical resistance.

An innovative recipe and ten layers of intensive application using a new method ensure that Live Pure not only sits on the surface of the floor, but is also massaged deep into the smallest pores of the wood itself. This means that no dirt can permeate into the pores. The result is an extremely hardwearing wooden floor with improved protection against wear and tear and very good resistance to scratches and stains (EN13442).

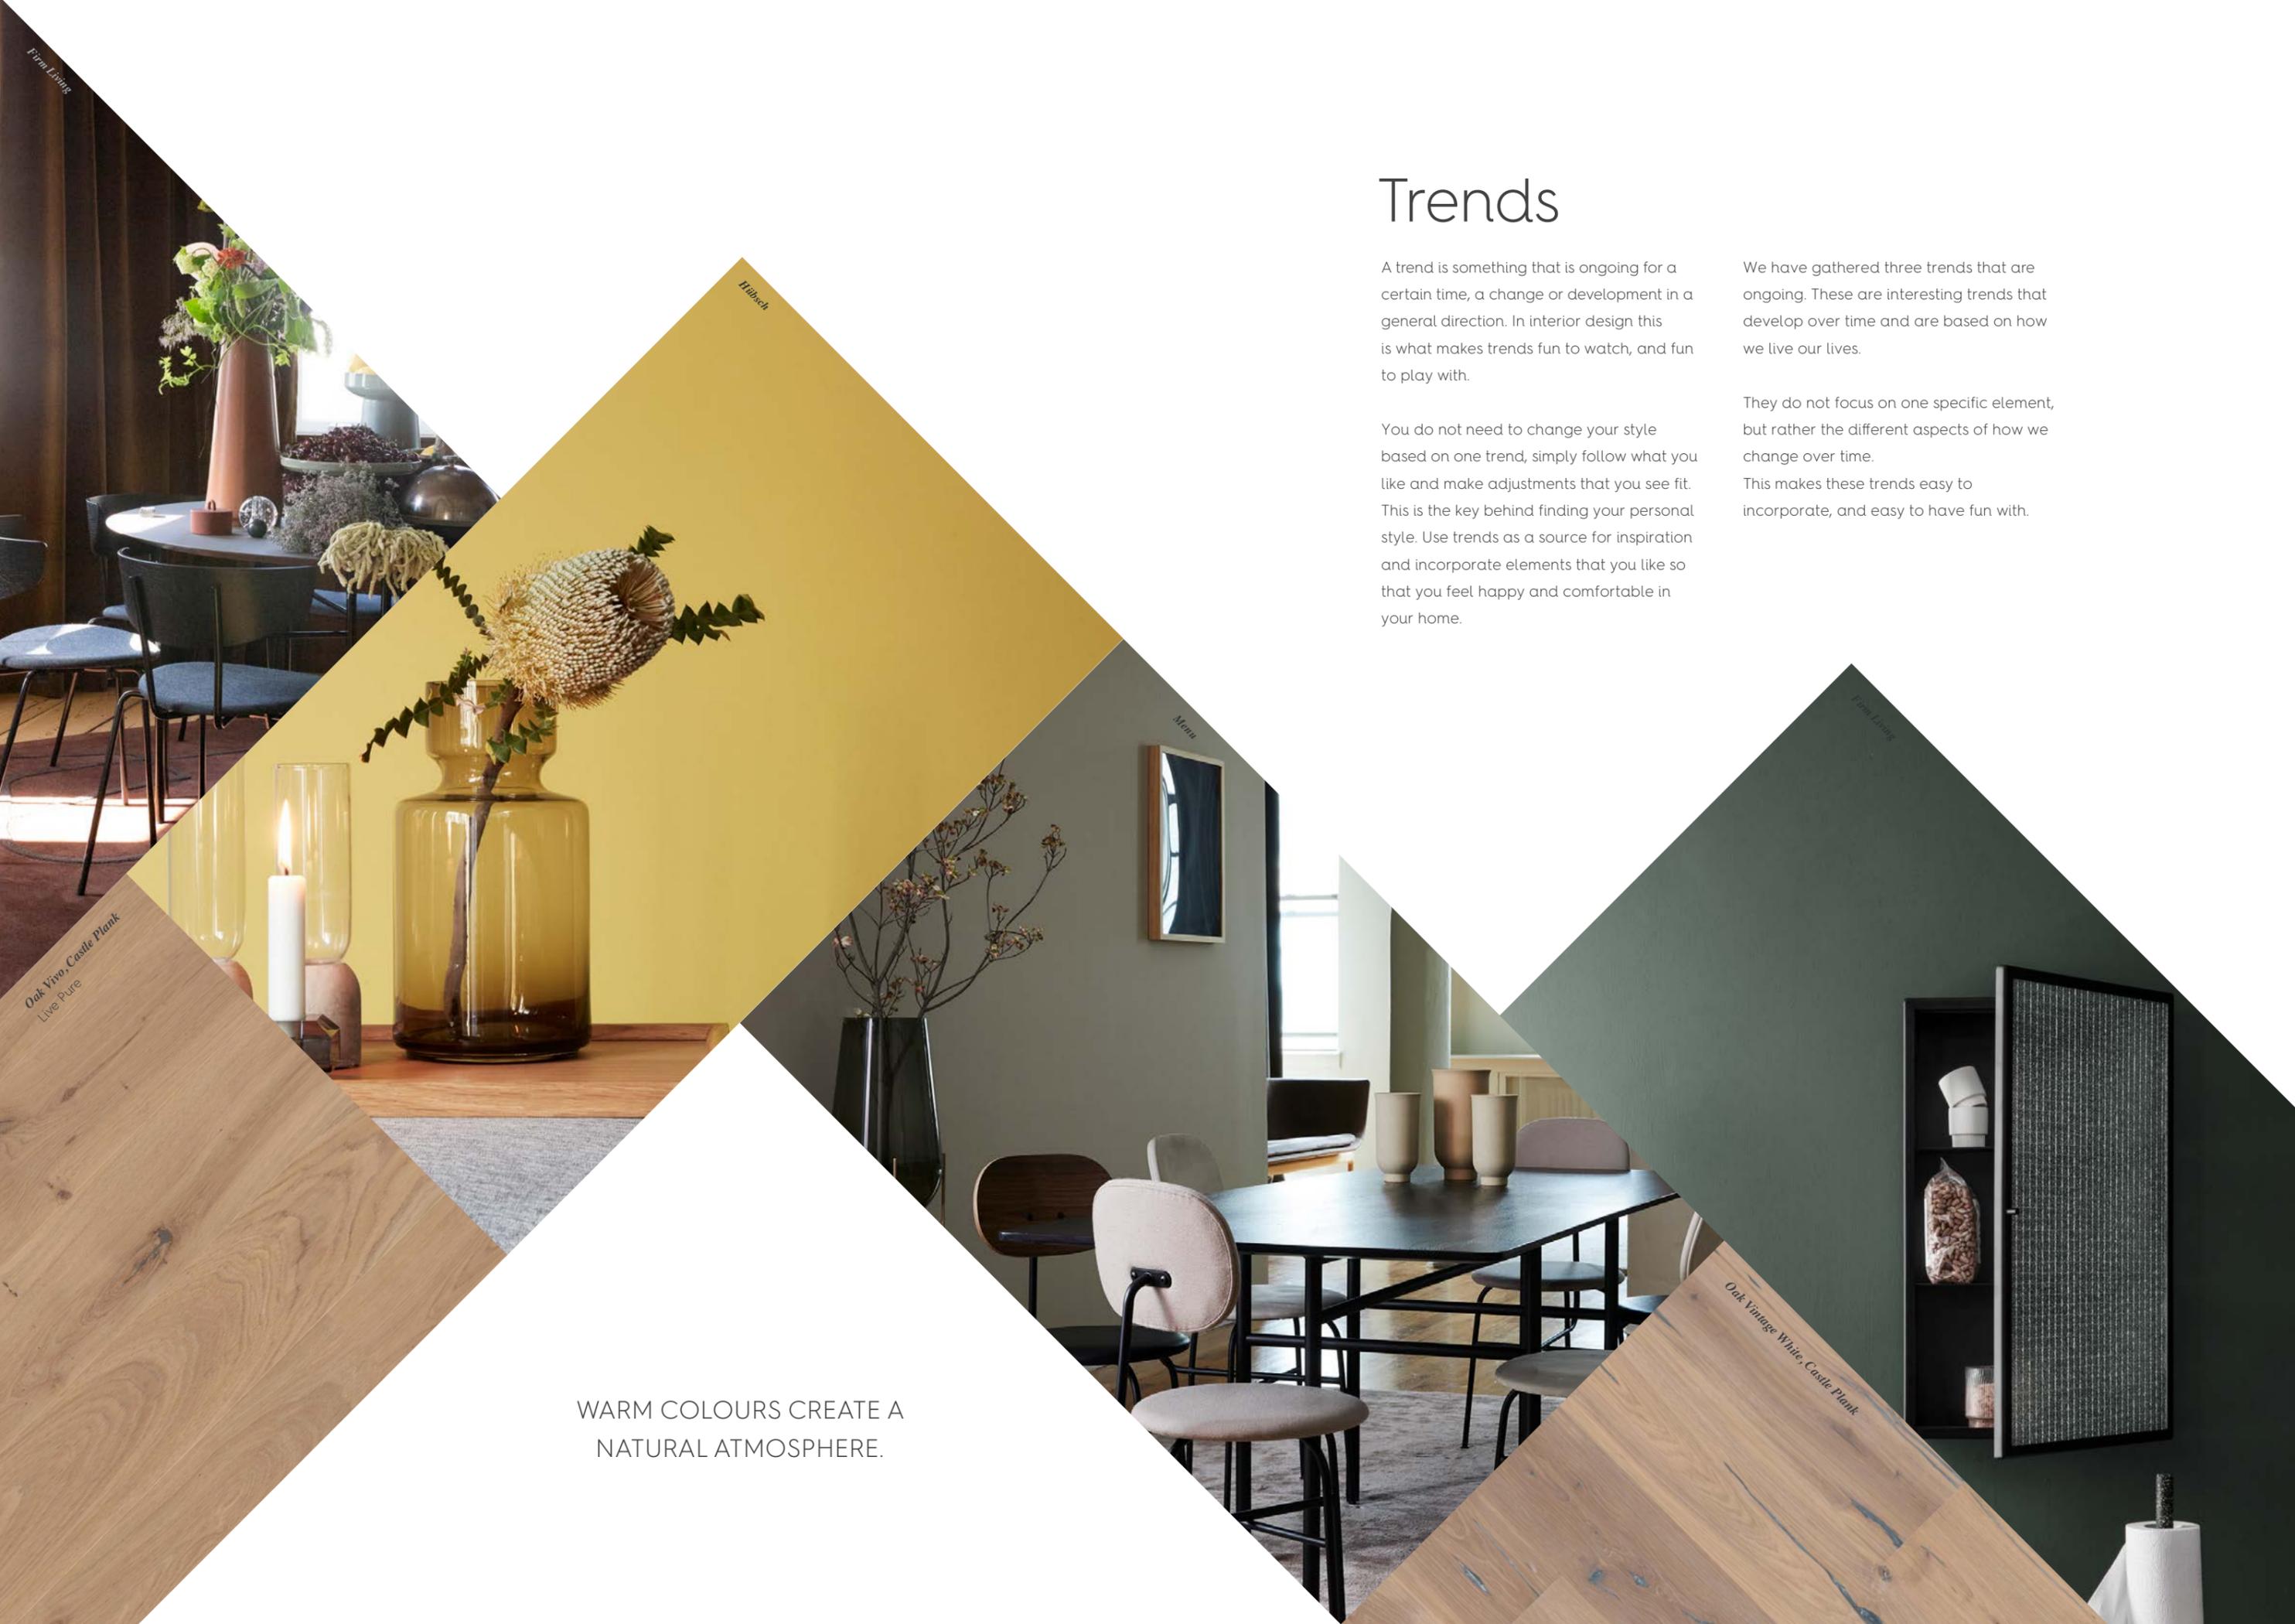

The appearance of untreated wood coupled with a high level of UV stability.

The combination of special Live Pure recipe and the intensive application ensures that the surface of the wood is closed. This means that the natural bleaching of wood that occurs with exposure to light is less pronounced in comparison to all other BOEN surfaces. In addition, the gloss level is two to three times lower than with standard coatings. This gives the wood a calming, ultra matt and authentic appearance – just like untreated wood

Easy to care for

Hardwood floors with Live Pure are sealed in a high-quality way and perfectly protected against dirt, dust and liquids. Maintenance is therefore not necessary following installation. However, wood flooring does suffer natural wear and tear, depending on the stresses to which it is subjected. We therefore recommend using our Polish Live Pure to care for it if necessary. For more information, simply request our cleaning and care instructions or find out more at boen.com

Trends

A trend is something that is ongoing for a certain time, a change or development in a general direction. In interior design this is what makes trends fun to watch, and fun to play with.

You do not need to change your style based on one trend, simply follow what you like and make adjustments that you see fit. This is the key behind finding your personal style. Use trends as a source for inspiration and incorporate elements that you like so that you feel happy and comfortable in your home.

We have gathered three trends that are ongoing. These are interesting trends that develop over time and are based on how we live our lives.

They do not focus on one specific element, but rather the different aspects of how we change over time.

This makes these trends easy to incorporate, and easy to have fun with.

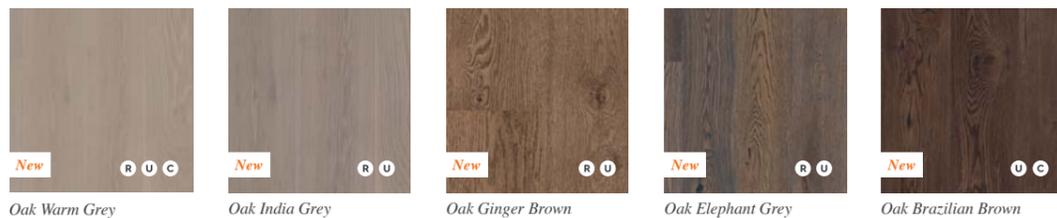

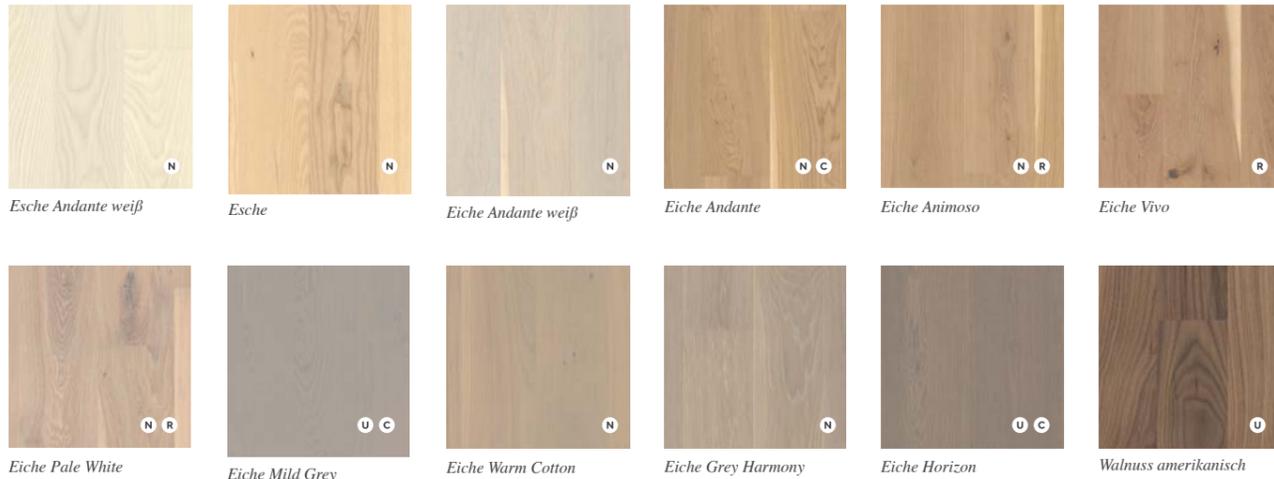

WARM COLOURS CREATE A
NATURAL ATMOSPHERE.

PATTERN

OUR NEW LIVE PURE FLOORS

The timeless colour of brown is the inspiration behind our new floors. The different shades of brown are to be found in the earth, the forest and the mountains.

We are proud to present five new floors with our *Live Pure* surface treatment: Oak Brazilian Brown, Oak Elephant Grey, Oak Ginger Brown, Oak India Grey and Oak Warm Grey. These are versatile floors that can be used in different environments depending on your style.

You inspire us. Our long experience gives us the strength to be innovative and bold. Changing a floor doesn't have to be an entire redecoration. It is about your style and your floor. How you do it is entirely up to you, but know that we can guide you through the process.

All our new floors have our innovative *Live Pure* surface treatment, that gives the floor a natural look and keeps the colour over time. *Live Pure* is a lacquer system that protects the floor from dust, dirt liquids and chemical agents.

The floors are maintenance-free and the natural look of wood is retained.

STYLES

Most of us do not really fit into only one style. But looking through the four style directions we have defined in our catalogue, you might find you are more drawn towards one style than the others. To help you find your floor, we recommend that you consider which style you are striving to achieve. Which style makes you feel the most comfortable at home?
