Our exclusive coatings

TOUCH-THERM

Our latest addition to our collection, a coating with the characteristics of our renown protective treatments with a wrought iron appearance.

Touch-Therm protects against rust, scratches and bumps, ensuring a long product life.

Technology and functionality with an authentic industrial look.

CHROMETHERM®

The exclusive treatment with a chrome effect.

An **ecological innovation** that reduces the impact on the main environmental indicators: global warming, water pollution, smog and acid rain.

Chrometherm® ensures long life to the product thanks to an excellent protection against rust, guaranteed 6 years.

Chrometherm® is the ecological solution!

POLYTHERM® The exclusive double coating by Metaltex

Polytherm® has 3 main advantages compared with classic LDPE coating:

1. Works as an **anti-rust treatment** – considerably **prolonging the product's life**.
2. Possesses **non-static properties** – making products **easy-to-clean**
3. Sleek **silver metallic look** – a colour that would look great in any space of the house.

All the Polytherm® collection is **Made in Italy** - offering a **5 year guarantee**.

POLYTHERM® *Copper*

An innovative surface treatment that combines the remarkable advantages of our double Polytherm® coating with a **metallic copper color**.

Copper has become a trendy metallic color used by designers and interior decorators worldwide for its perfect balance between modernity and tradition.

The glow that brings elegance and natural warmth into the home.

POLYTHERM® *Frost*

An innovative surface treatment that combines the remarkable advantages of our double Polytherm® coating with an **anodised aluminum look**. These are its qualities: resistance to heat and rust; anti-shock properties to avoid breakage or abrasion; anti-electrostatic effect so that dust can be removed easily. The result is a highly resistant product, smooth to the touch and with a particular matt and vibrant finish.

Soft as silk, bright as ice.
