Care instructions | In-Outdoor rug collection

Vacuum with no beater bar/rotating brush.
Spot clean with water, with mild detergent.

The backing may get soft when the rug is wet, but this is common.
Air or sun-dry the rug and backing to get it back to normal.

When the rug is cleaned or wet it would be good to move it from the area and turn it upside down to dry the backing and the surface underneath as the water would go through the rug.

When placed on an uncovered wooden patio deck we advise to remove and/or flip the rug during wet weather since it may cause mold or reaction between the latex and wood alkalis.

The rug is water resistant and ideally should be dried upside down.

To extend longevity of the rug we advise you to store it away during bad weather and winter months.

B&C

At Brink & Campman we make collections of thoughtfully designed premium rugs. Brink & Campman has over 125 years of experience doing so. The craft of rug making means that no two rugs are exactly alike. The natural materials used in a handcrafted product might cause deviations in colour, texture or size.

This brochure has been created with great care. We make allowance for a degree of colour variation and cannot be held responsible for any printing errors or changes in the collection.
